STARK COLLECTING SWEEPERS, CSW ADVANCED MODEL

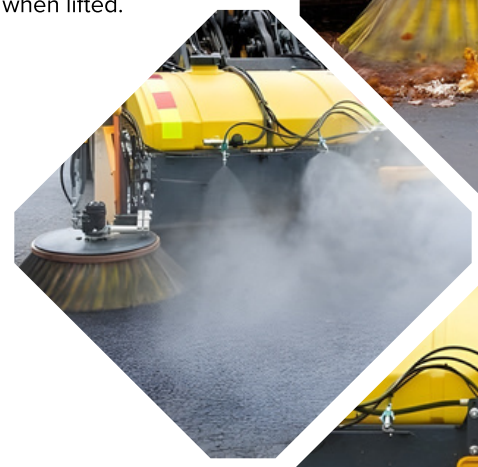

SWEEPING

- **The professional choice for sweeping streets and yards.**
- **Designed for efficiency.**
- **Good visibility improves safety**

- Reliable, durable and dependable due to its sturdy structure and high-quality components.
- 900 mm lamellas for better results and improved cost efficiency.
- The optional high-pressure dust binding system significantly reduces street dust and water consumption.
- Hydraulic side brushes (optional) pivot to the front of the sweeper.
- When lifted up, side brushes do not add to the width or the length of the sweeper.
- The large bottom hatch makes clearing the waste container easy.
- Sweepers hydraulic motor is integrated into the brush roller.
- The floating brush roller and adapter ensure professional results and protect the sweeper from damage.
- Stepless adjustment of sweeper height.
- The bolt-on STARK FIT adapter can be easily replaced to fit the base machine.
- Hydraulic lift of side brush disables side brush rotation and dust binding when lifted.

STANDARD EQUIPMENT

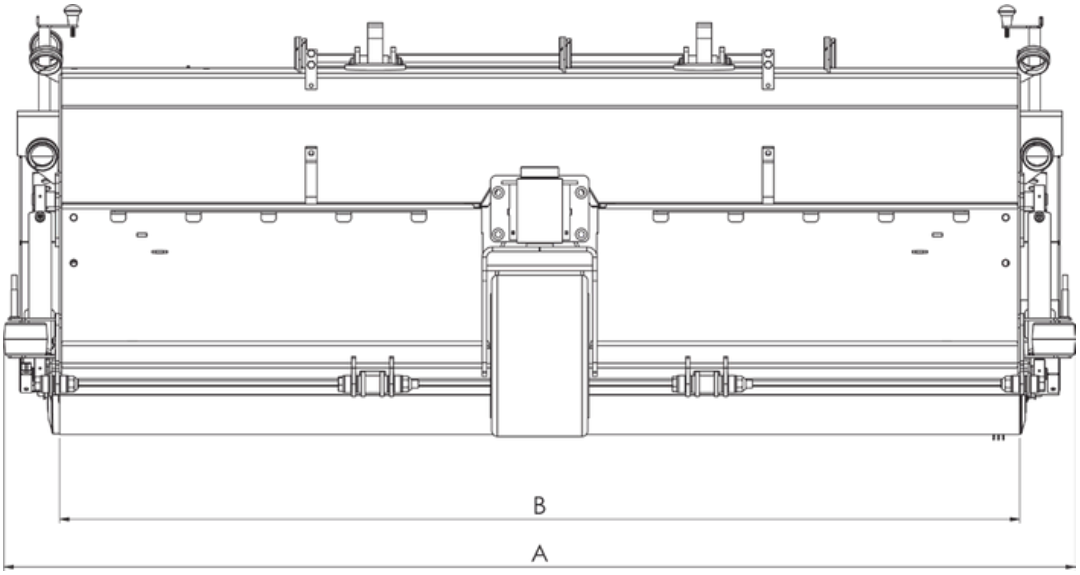

- Vertical, lateral and longitudinal floating
- Block hydraulics
- Mechanical locking of the hydraulic bottom hatch
- Heavy-duty support wheels

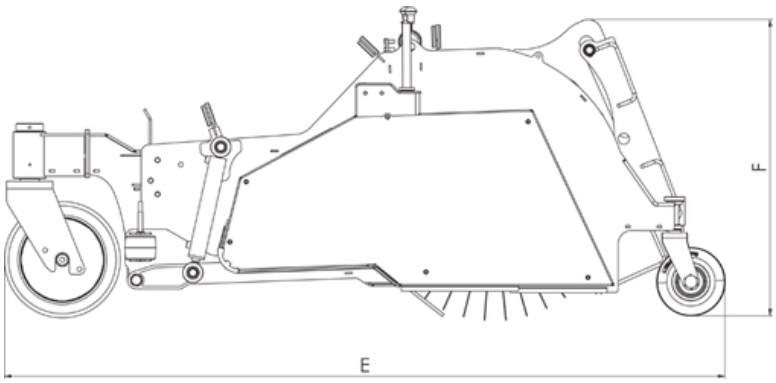

ACCESSORIES

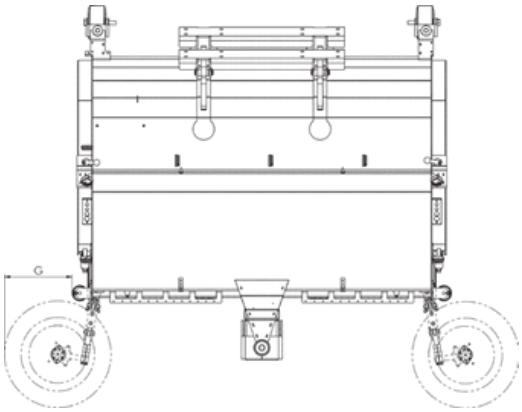

- High-pressure dust binding system
- Pressure washer gun with a 15 m hose reel
- Side brushes

900 LINE · STARK FIT · 2.0 SWEEPER FLOAT SYSTEM · DBS
