STARK COLLECTING SWEEPERS, CSW BASIC MODEL

SWEEPING

- **The professional choice for sweeping streets and yards.**
- **Designed for efficiency.**
- **Good visibility improves safety**

- Reliable, durable and dependable due to its sturdy structure and high-quality components.
- 900 mm lamellas for better results and improved cost efficiency.
- The optional watering system reduces street dust.
- The hydraulically raised side brush (optional) moves in front of the sweeper.
- When raised, the side brush does not take up space in the lateral or longitudinal direction of the sweeper.
- The large bottom hatch makes clearing the waste container easy.
- Sweepers hydraulic motor is integrated into the brush roller.
- The floating brush roller and adapter ensure professional results and protect the sweeper from damage.
- Stepless adjustment of sweeper height.
- The bolt-on STARK FIT adapter can be easily replaced to fit the base machine.
- For instance, hydraulic lift of side brush disables side brush rotation and watering when lifted.

STANDARD EQUIPMENT

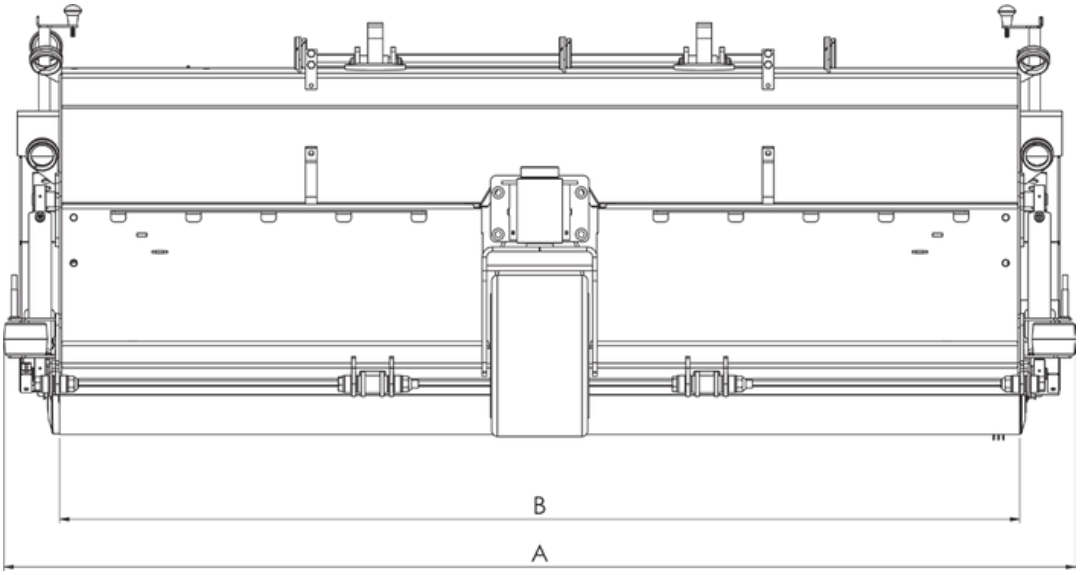

- Vertical, lateral and longitudinal floating
- Block hydraulics
- Mechanical locking of the hydraulic bottom hatch
- Heavy-duty support wheels

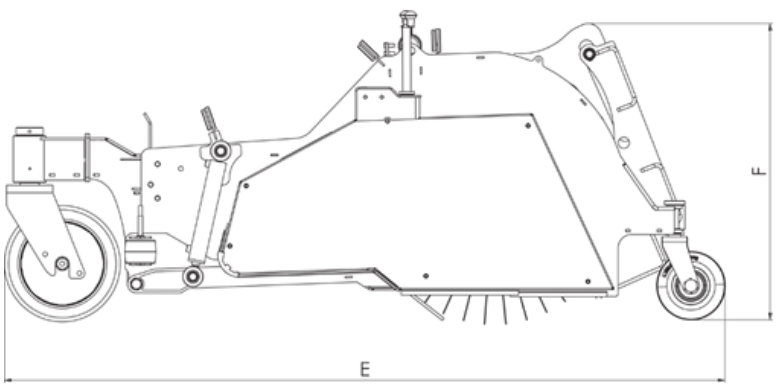

ACCESSORIES

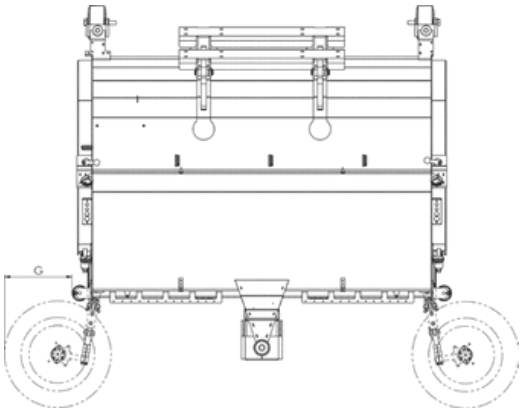

- Side sweeper - left or right
- Watering system 12/24V
