STARK DIAGONAL PLOW

SNOW PLOWING

- **Strongest choice for a universal plow for plowing roads and areas.**
- **Excellent snow throwing features and an option for snow stopper.**

- FLOATING FRAME enables the plow to follow the ground closely. Sliding plates and the positioning of the frame reduces bouncing while working.
- The ADS safety system and an overload valve protects the driver, the base machine and plow itself from damage when collision happens.
- Snow dust guide in front of the wing guides snow away from the windshield. Its hazard decal makes the plow more visible to other road users. This feature adds efficiency and safety for the plowing work.
- Snow stopper makes clearing intersections more efficient. Snow stopper can be retrofitted to the plow.
- STARK FIT -tool attachment system enables fast change between different base machines. There is a wide range of different adapters, for example 3P / Volvo BM -combined adapter.

STANDARD EQUIPMENT

- Led lights and reflectors
- Rotating support plates
- Bracket for snow stopper
- Casted PUR snow dust guide

OPTIONAL EQUIPMENT

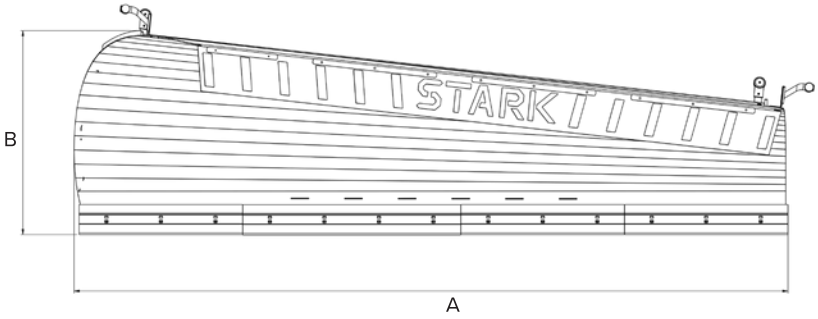

- Snow stopper
- Support wheels
- Special paint
- Hard metal blade sets
